Open to relocation: Pune, Mumbai, Hyderabad, Bengaluru, Delhi NCR, Gujarat | **Immediate Joiner**

Summary

Computer Science graduate (B.Tech, CGPA 8.3, May 2026) seeking an entry-level SOC Analyst or VAPT role. Built a cloud SOC lab that ingests AWS CloudTrail and VPC Flow Logs into Splunk with MITRE ATT&CK-mapped detections. Top 2% on TryHackMe, with hands-on work in vulnerability assessment, Wireshark and enterprise firewalls (Palo Alto, Fortinet, Check Point).

Technical Skills

SOC and detection: Splunk (SPL, dashboards, alerting), MITRE ATT&CK mapping, log analysis, alert triage, incident response (NIST CSF).
Vulnerability assessment: Nmap, Metasploit, Burp Suite, OWASP Top 10, privilege escalation, CVE mapping, remediation reporting.
Network security: Wireshark, Palo Alto NGFW, FortiGate, Check Point, Cisco ASA, Zscaler (ZIA, ZPA), VLANs, OSPF, NAT/PAT, ACLs.
Cloud: AWS (CloudTrail, VPC Flow Logs, IAM, S3, CloudWatch), Google Cloud (VPC, Cloud Armor).
Scripting and systems: Python, Bash, C++, Linux (Ubuntu, RHEL), Docker, Git.

Projects

Home SOC Lab: Splunk and AWS Telemetry | *Splunk, AWS CloudTrail, VPC Flow Logs* [GitHub]
- Built a pipeline that ingests AWS CloudTrail management events and VPC Flow Logs into Splunk Enterprise.
- Wrote SPL detections mapped to five ATT&CK techniques: brute force (T1110), unauthorized root login (T1078), IAM privilege escalation (T1098), public S3 bucket (T1530) and port scanning (T1046).
- Built an analyst dashboard with threshold-based alerts for incident monitoring.

Enterprise Firewall Topology and Network Isolation | *Cisco ASA, Check Point, GNS3, Python* [GitHub]
- Designed a multi-branch GNS3 topology that separates OUTSIDE, DMZ and CORP-INTERNAL zones using Cisco ASA and Check Point VSX firewalls.
- Configured stateful inspection, NAT/PAT and deny-by-default ACLs. Wrote a Python script that flags overly permissive rules and cleartext protocols.

Port-by-Port Vulnerability Assessment | *Nmap, Metasploitable, Kali Linux* [GitHub]
- Scanned every port on a Metasploitable target with Nmap (-sS, -sV, -sC) and audited FTP, SSH, Telnet, SMB and HTTP services.
- Mapped services to CVEs and wrote a remediation report recommending port filtering and retiring legacy protocols.

Packet Analyzer | *C++17, libpcap, multi-threading* [GitHub]
- Built a multi-threaded analyzer that decodes Ethernet, IPv4/IPv6, TCP, UDP and ICMP headers from live capture, with atomic counters reporting packets per second and Mbps.

Virtual Internships

Zscaler (EduSkills AICTE) | *Zero Trust Cloud Security Virtual Intern* Apr 2026 – Jun 2026
- Configured ZTNA, ZIA and ZPA policies and studied SASE architecture.

Palo Alto Networks (EduSkills AICTE) | *Cybersecurity Virtual Intern* Jan 2026 – Mar 2026
- Configured PAN-OS App-ID, User-ID and Content-ID policies and analyzed traffic telemetry with Cortex XDR concepts.

Google Cloud (EduSkills AICTE) | *Network Security Virtual Intern* Jul 2025 – Sep 2025
- Set up VPC firewall rules, Cloud NAT, VPC peering and Cloud Armor policies against Layer 7 and DDoS attacks.

Fortinet (EduSkills AICTE) | *Network Security Virtual Intern* Apr 2025 – Jun 2025
- Configured FortiGate 7.4 policies, SSL-VPN and IPS profiles, and reviewed FortiOS logs for simulated threats.

BrainOvision Solutions | *AWS DevOps Intern* Feb 2024 – Mar 2024
- Provisioned EC2, S3, IAM and VPC resources, and set up CodePipeline deployments and CloudWatch alarms.

Education

Anjuman College of Engineering and Technology **Nagpur, India**
B.Tech, Computer Science and Engineering (CGPA: 8.3/10.0, GATE CS 2026: 355) *May 2026*

Certifications & Platforms

Certifications: Google Cybersecurity Professional, Google IT Support Professional, Palo Alto Networks (Cybersecurity Foundation, Network, Cloud, Security Ops), Zscaler (Cybersecurity, ZTCA), Fortinet NSE 1 & NSE 2.
Training: CEH v13 (Unisoft Technology, exam planned), CCNA and Network+ (Unisoft Technology).
Platforms: TryHackMe (Top 2% globally, Level 12 [GURU], 115+ rooms – Profile), HTB Academy (Level 3, Junior Cybersecurity Analyst Path), PortSwigger Web Security Academy (SQLi, XSS, CSRF, IDOR, SSRF), OverTheWire (Bandit).
